Nou is an innovation center and a human spaces collector.

We are committed to creating new housing models following a precise philosophy: passion for architecture, dialogue between urban and natural contexts, and designing spaces tailored to human needs.

We are an engineering company specialized in the development of architectural projects for both public and private clients.

VISION

Building human spaces for a sustainable future

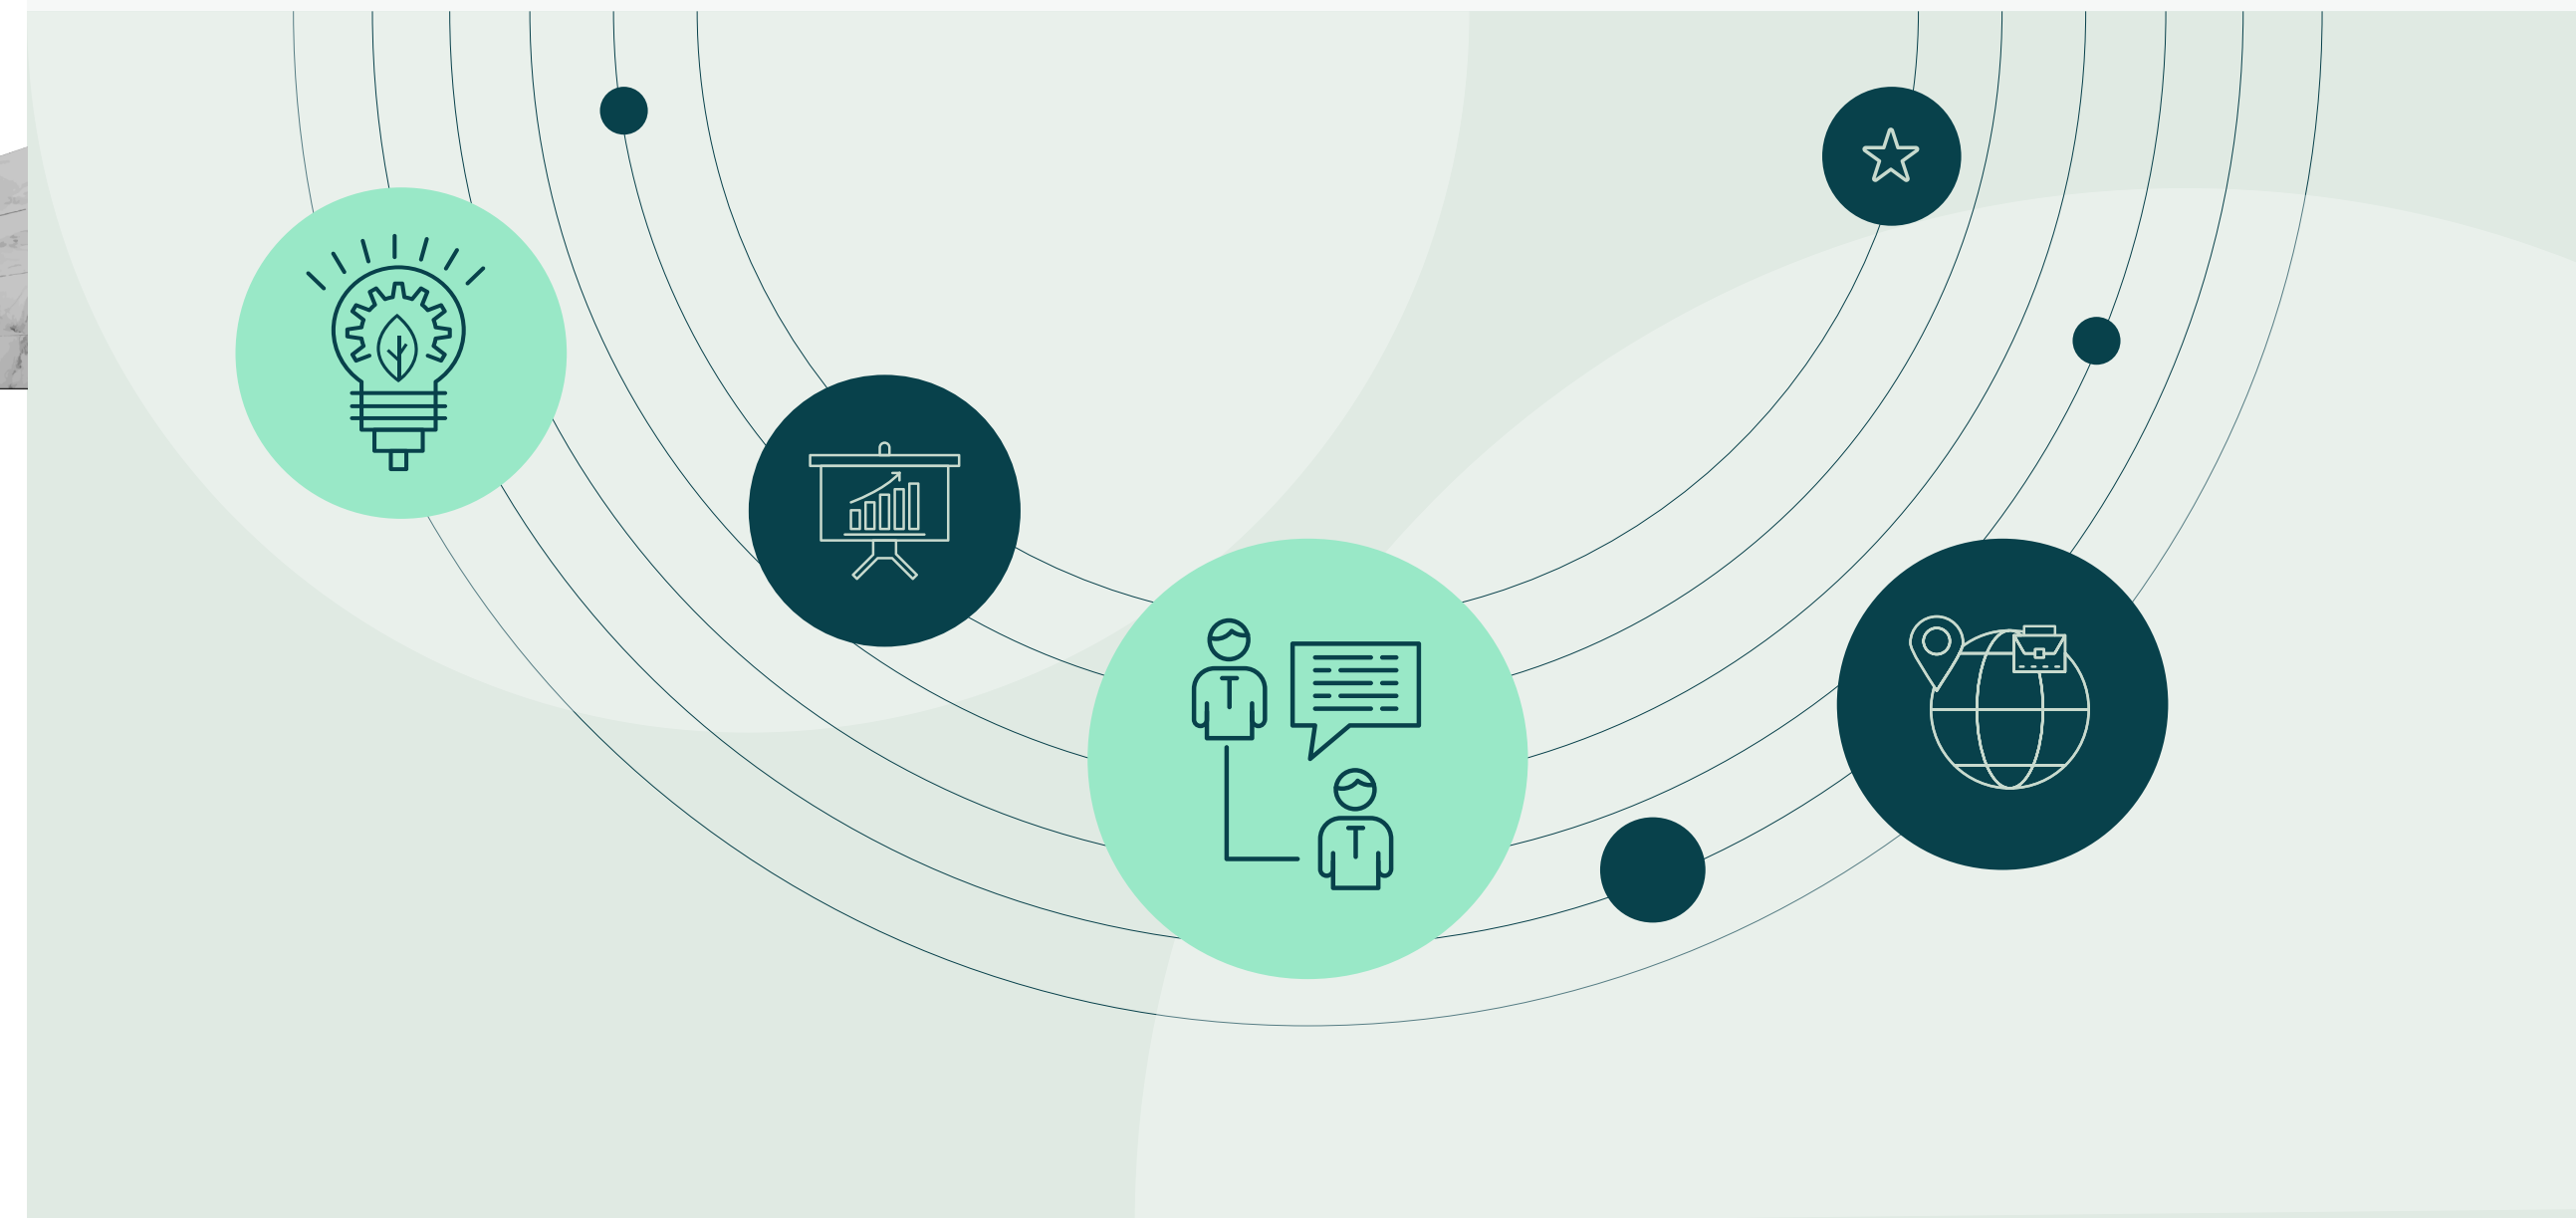

Guided by the principles of **sustainability and inclusive design**, we develop tailor-made projects for human beings. From individual living environments to public services and urban planning, **we aim to enhance the user experience while respecting and harmoniously integrating with the surrounding environmental and social context.** Our goal is to spread this vision by consolidating our presence both nationally and internationally.

MISSION & VALUES

Quality Process, Quality Product

We are committed to continuously **improving the quality of our processes and products**. We introduce innovative quality management methodologies aimed at **customer satisfaction and optimizing operational efficiency**. We promote personal development and collaborative work, creating a strong bond among stakeholders, company executives, and our team.

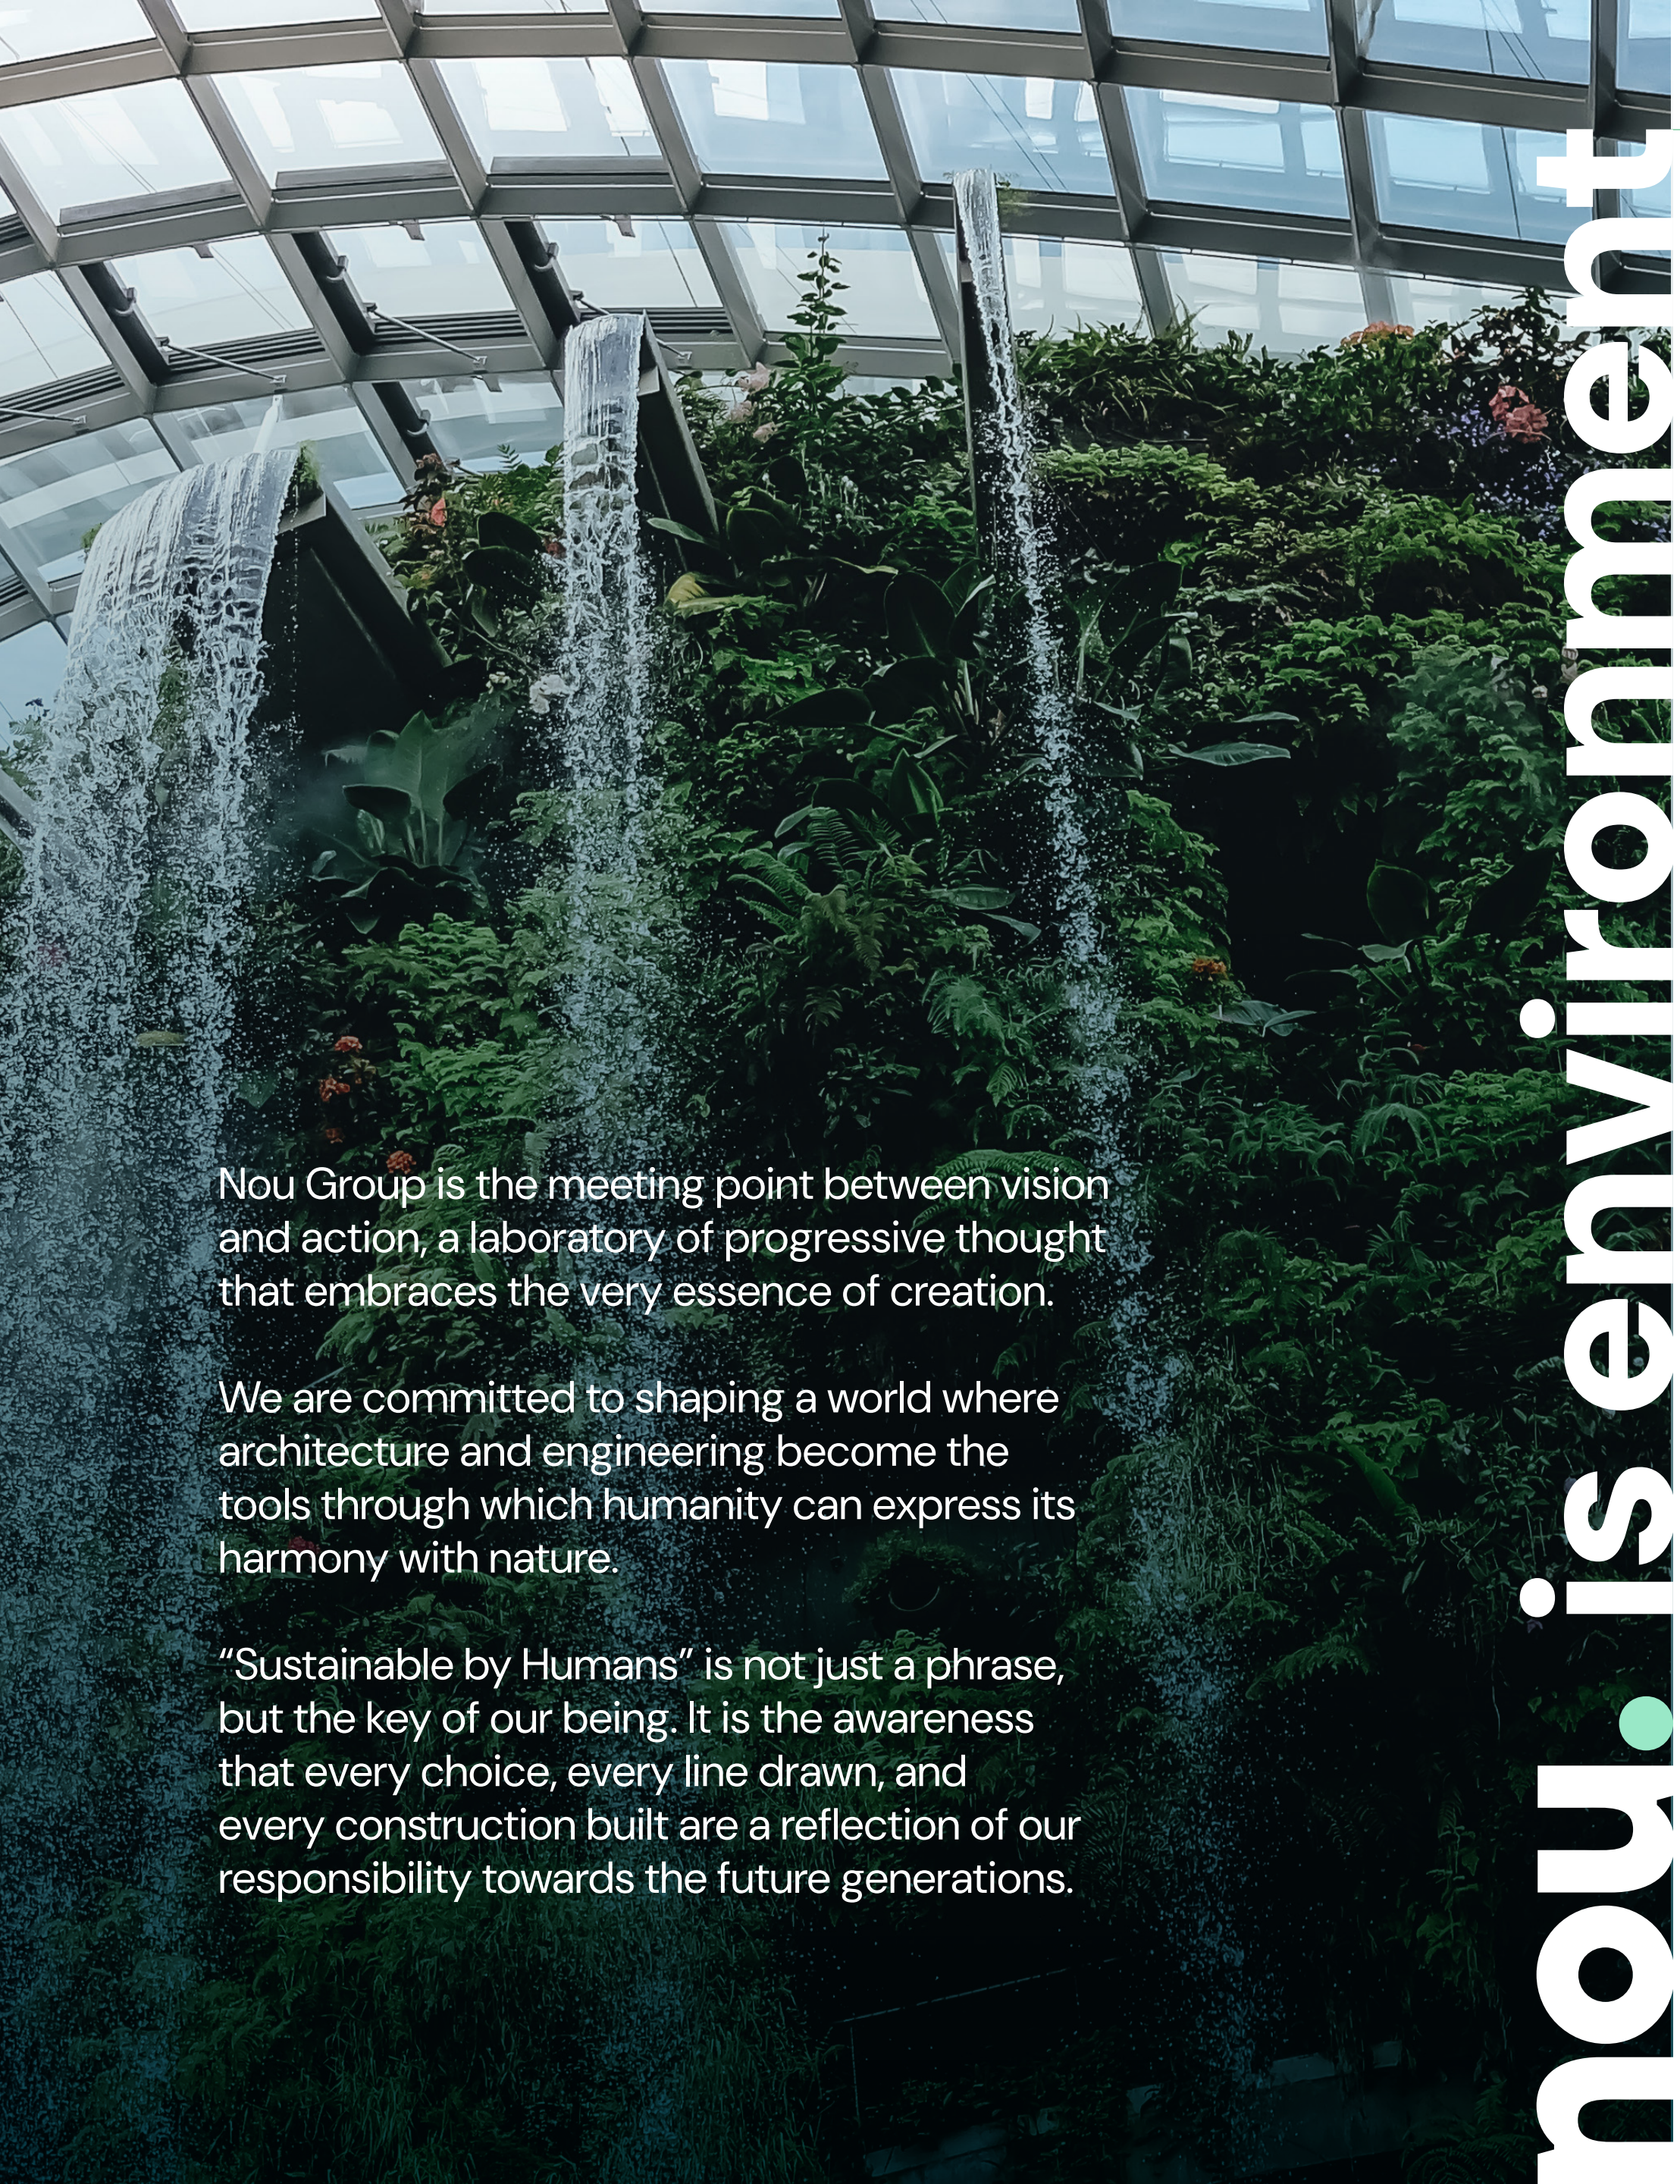

Sustainability

Sustainability is the approach that we use for thinking and building the future both environmental and social. It is a method of creating an accessible world for all of us. Sustainability is the main guide that directs choices and actions to insure achievement of People's and Nature's Well-Being into the urban environment.

Well-being

Well-being is the result of a constant search for balance between space and people. It's what guides the creation of a human space, a place where harmony is the ultimate goal of each design proposal.

nou is environment

Nou Group is the meeting point between vision and action, a laboratory of progressive thought that embraces the very essence of creation.

We are committed to shaping a world where architecture and engineering become the tools through which humanity can express its harmony with nature.

“Sustainable by Humans” is not just a phrase, but the key of our being. It is the awareness that every choice, every line drawn, and every construction built are a reflection of our responsibility towards the future generations.

CEO & FOUNDER

Alessandro Graziotti
CFO & CO-FOUNDER

Luca Inghilleri
CSO & PROJECT DIRECTOR

Architecture Engineering

Our Architecture is human-centered and it can be applied to the educational, healthcare and institutional Area to promote a new responsible approach for the future. Each project is a chance to build spaces able to evoke emotion and to allow new interactions between social and natural systems.

Renewable

We are building the present green. We have developed a series of photovoltaic parks in Europe and Italy with a production capacity of more than 1GW, aiming to become leaders in the renewable energy sector. Our integrated service addresses all stages of the production process – from pre and postproject consultancy – allowing us to optimize resources sustainably.

Human Capital

Nou Group is a company structured as a **professional think tank**, where the foundation of success lies in collaborative teamwork and constant interaction among different organizational levels.

We are constantly creating new opportunities for professional growth and strong synergies inside the company.

The studio's leadership enables each employee to find their place within the organization and thus fully express their commitment and contribution to the group.

YEARS OF PRACTICE

8

Projects

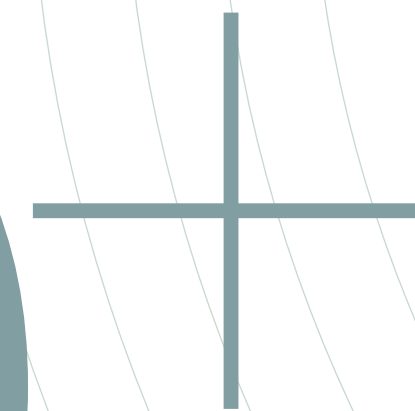

Building an ideal space means **designing the present as we desire it**. For Nou, the layout and structure of every environment represent a **vision of the world that speaks to human sustainability**. It's a well-defined design model where humans are at the center and the environment develops as its natural extension.

SECTORS

What we design:

Commercial & Residential

Residential Buildings
Office Buildings
Hotels
Industrial Buildings
Mixed-use Developments

Government & Institutional

Public Administration:
Courts, Government offices

Emergency Services:
Civil protection, Barracks

Transport & Logistics:
Interports, Operational centers

Culture & Restoration

Historical complexes
Cultural centers
Museums

Sport

Football stadiums
Sports fields
Recreational facilities

Educational

Universities
Primary & Secondary schools
Nurseries

Healthcare

Hospitals
Red Cross Buidings
Clinics & Polyspecialist centers
Community homes

Retail

Stores
Pop-Up Stores
Showrooms
Shop Front Design

Infrastructure

Railway stations
Solar parking
Solar Farms
